

COMMUNICABLE DISEASES

Section J: Students

File: JLCC

The District is required to provide educational services to all school age children who reside within its boundaries. By law, however, admission to school may be denied to any child diagnosed as having a disease whereby attendance could be harmful to the welfare of other students and staff, subject to the

District's responsibilities to handicapped children under the law. The School Committee recognizes that communicable diseases which may afflict students range from common childhood diseases, acute and short-term in nature, to chronic, life-threatening diseases.

Management of common and uncommon communicable diseases shall be in accordance with Massachusetts Department of Health guidelines. A student who exhibits symptoms of a communicable disease may be temporarily excluded from school attendance. The District reserves the right to require a physician's statement authorizing the student's return to school.

The educational placement of a student who is medically diagnosed as having a life-threatening communicable disease shall be determined on an individual basis in accordance with this policy, Mandates from the Department of Health, and accompanying administrative procedures. Decisions about the proper educational placement shall be based on the student's behavior, neurological development, and physical condition; the expected type of interaction with others in school setting; and the susceptibility to other diseases and the likelihood of presenting risks to others will be taken into consideration. A regular review of the placement decision shall be conducted to assess changes in the student's physical condition, or based on new information or research that may warrant a change in a student's placement.

In the event a student with a life-threatening communicable disease qualifies for services as a handicapped child under state and federal law, the procedures for determining the appropriate educational placement in the least restrictive environment shall be used in lieu of the procedures designated above.

Neither this policy nor the placement of a student in any particular program shall preclude the administration from taking any temporary actions including removal of a student from the classroom as deemed necessary to protect the health, safety, and welfare of the student, staff, and others.

In all proceedings related to this policy, the District shall respect the student's right to privacy. Only those persons with a direct need to know shall be informed of the specific nature of the student's condition. The determination of those who need to know shall be made by the Superintendent.
